Skills

- **Languages**: Java (Primary), Python, SQL
- **Tools & Technologies:** Power BI(DAX), Excel (Power Query, Formulas)
- **Libraries & Concepts:** Pandas, NumPy, Machine Learning, Data Cleaning, EDA, DBMS, OOPs
- **Soft Skills**: Problem-Solving, Logical Thinking, Team Collaboration, Adaptability

Projects

- **End-to-End Customer Intelligence | Python, Machine Learning | GitHub** Feb' 26
  - **Performed end-to-end data analysis** with EDA and statistical hypothesis testing to identify key churn drivers and customer behavior patterns.
  - **Built and evaluated** multiple **machine learning models** (Logistic Regression, SVM, Random Forest, MLP) using cross-validation, achieving optimized performance with ROC-AUC, Precision, and Recall metrics.
  - **Applied** customer segmentation, association rule mining, and PCA to estimate revenue risk and generate actionable retention and recommendation strategies.
- **HR Attrition Analytics Project | Excel, Power BI | GitHub** Jan' 26
  - **Analyzed** employee data to identify key attrition drivers by department, salary, experience, and job satisfaction; created salary bands, experience groups, and an **Attrition Risk Score model** using Excel (Power Query & Formulas).
  - **Created interactive Power BI dashboards** with KPIs, slicers, and drill down views; calculated attrition rate, department-wise risk, and employee turnover trends using **DAX measures**.
  - **Delivered** actionable **HR insights** to highlight high-risk employee segments and support data-driven retention and workforce planning decisions.
- **Smart Knowledge Search Engine | Java, DSA Based Intelligent Search | GitHub** Nov' 25
  - **Developed** a console-based intelligent search engine using **Core Java** and **Data Structures** for efficient note storage, retrieval, and searching.
  - **Implemented** a **Trie (Prefix Tree)** to enable fast search operations and real-time autosuggestions, optimizing overall search performance.
  - **Integrated file handling** for persistent storage and a lightweight **AI/NLP-based keyword extraction module** to identify meaningful terms from text input.

Training

Fundamentals of Data Structures and Algorithms | Cipher Schools Jun' 25

- Completed structured training covering **core concepts** including arrays, sorting, recursion, linked lists, stacks, queues, trees, graphs, Dynamic Programming and hashing & strengthened problem-solving skills through hand-on implementation of core algorithms.
- Project – **Library Management System:** Designed and developed a console-based application using linked lists and binary search trees to manage book records, search efficiently, and handle borrowing/return transactions.

Achievement

- Solved **100+ DSA problems** on LeetCode, earning 3 achievement badges, validating strong problem-solving skill

Certificates

- Completion of Cloud Computing | **NPTEL** Apr' 25
- Completion of OOP(Object Oriented Programming) | **iamneo** Dec' 24
- Completion of Java+DSA | **Apna College** Aug' 23

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.2*** Since Aug' 23
- **Chaurasia Raj Kishor College** Hajipur, Bihar
  Intermediate; ***Percentage: 71%*** Apr' 22 – Mar' 23
- **St. Paul's High School** Hajipur, Bihar
  Matriculation; ***Percentage: 91%*** Apr' 20 – Mar' 21
